

***Science Portfolio Requirements  
Due February 27, 2020 to the  
Student Center by 3:00 PM***

***Student portfolios are due to the Student Center by February 27, 2020.***

Portfolios should contain the following:

- Two assignments from science class. Each assignment should have a reflection explaining why the piece was chosen and what you learned from the assignment. Some guidelines for choosing assignments:
  - One assignment that shows master of the content
  - One assignment that shows need for improvement
- A PowerPoint presentation highlighting a STEM career that you are interested in. The PowerPoint should include on each slide a picture, interesting background, and transitions. The PowerPoint should also be clear, concise, free of grammatical errors, written in complete sentences, NOT plagiarized, and include a works cited page in APA style using Noodle Tools.
- PowerPoint slides also address the following points:
  - Best attribute of the job
  - Skills required to be hired for the job
  - The level of education required for the job
  - The benefits of the job (including the salary)
  - Why you are interested in it
  - How it relates to your science courses you have taken at Draper Park
- You should print your PowerPoint for your portfolio, and also plan to present it at the interview, as well as answer questions for consideration.
- A five-paragraph essay (typed, double-spaced, 12 pt. font) on the role science plays in sustaining the Earth. The essay should be clear, concise, free of grammatical errors, written in complete sentences, NOT plagiarized, and include a works cited page in APA style using Noodle Tools.

The interviews will be conducted on March 27, 2020.
